DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, and 27-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 31, it is not clear exactly what the inventive structure comprises. Do these claims actually require the presence of a lead in the opening? In claims 1 and 32, the recitation that the opening in the covering structure is "greater" or "larger" than the end of a lead is vague and indefinite as to the specific structure being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 27-32, 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Val et al, of record. As amended, the claimed subject matter now appears to read on the Val reference. As described in the previous action, hereby incorporated by reference, Val shows a related device, for example, in Figs. 10 and 11, which includes a body of semiconductor material having a first and second face, electrical connection regions formed on the periphery of the first (top) face, a covering structure (33) covering the first face, an opening in the covering structure

to accommodate a lead (see Fig. 10), and a heat dissipation region (31) in direct contact with the second face.

In addition, as shown in Fig. 11 of Val, element (45) constitutes a lead which extends from the connection region in a direction substantially parallel to the first face, and in a direction transverse to the third, or side, face of the body, as claimed.

Furthermore, Val shows such features as the side face of the covering structure formed in the same plane as the body. Val also teaches the specific dimensions and materials claimed, as discussed in the previous action.

Insofar as the claims are understood, Val appears to disclose all of the structural elements and features of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is (703) 308-4898. The examiner can normally be reached on Monday through Wednesday.
